1.

2. He visited [redacted] who was noncommittal on the subject of UFO's. The scientist who served as translator, a radio astronomer, emphatically stated that he knew of no sightings of UFO's in the USSR and added with a laugh that if they were only seen in the US, they must be of Soviet origin.

3. At the [redacted] one of the astronomers mentioned that she had heard of some sightings of unidentified objects near the Caucasus. She was unaware of any study being made of them but was open-minded on the subject.

4. The [redacted] main visit was to [redacted] who was very interested in the problem. He had read Menzel's book (which has been translated into Russian) but did not accept his conclusions. [redacted] knew of some sightings in the northern part of the USSR, but said that reports of such sightings are not printed in Soviet newspapers because they are not regarded as scientific observations. (Comment: this is interesting in view of the readiness of Soviet newspapers to print rather fantastic reports of hypotheses and "observations" suggested by the more imaginative members of the scientific community. Apparently some official reaction is needed.) [redacted] has been interested in US reports of UFO's and readily accepts their reality. In fact, it is his personal opinion that the UFO's may originate on Venus. He is well aware of the negative effect of "enlightened" scientific opinion on the interpretation of questionable observations as he has had personal

2. He visited [redacted] who was no occult-
tal on the subject of UFO's. The scientist who served as translator,
a radio astronomer, emphatically stated that he knew of no sightings
of UFO's in the USSR and added with a laugh that if they were only seen
in the US, they must be of Soviet origin.

3. At the [redacted] one of the astronomers mentioned
that she had heard of some sightings of unidentified objects near the
Caucasus. She was unaware of any study being made of them but was open-
minded on the subject.

4. The [redacted] main visit was to [redacted] who was very inter-
ested in the problem. He had read Meinel's book (which has been trans-
lated into Russian) but did not accept his conclusions. [redacted] knew
of some sightings in the northern part of the USSR, but said that re-
ports of such sightings are not printed in Soviet newspapers because
they are not regarded as scientific observations. (Comment: this is
interesting in view of the readiness of Soviet newspapers to print ra-
ther fantastic reports of hypotheses and "observations" suggested by the
more imaginative members of the scientific community. Apparently some
official action is needed.) [redacted] has been interested in US re-
ports of UFO's and readily accepts their reality. In fact, it is his
personal opinion that the UFO's may originate on Venus. He is well
aware of the negative effect of "enlightened" scientific opinion on
the interpretation of questionable observations as he has had personal

experience of this effect. (Comment)

5. At the [redacted] little interest is shown in the UFO question. [redacted] mentioned that he and several other astro-
nومers had been out in the countryside one evening and had seen a
curious, reddish object flashing through the sky that they were convinced
was neither a satellite nor a meteorite. However, their immediate in-
terpretation was that this object might have been a fragment of a satel-
lite or rocket returning from orbit, burning up in the atmosphere. [redacted]
thought that UFO's had been seen in the USSR but he could not be specific
as to locations and characteristics.
6. At the [redacted] again little interest
was shown. One of the astro-
nومers, [redacted] was with the group men-
tioned by [redacted] and confirmed the observation of a peculiar object. He
did not discuss the experience in detail but clearly had been struck by
the possibility that the object might have been a "saucer."
7. At the [redacted] there was considerable interest.
The institute includes [redacted] presided over by
[redacted] However, the initial discussion of the problem was with
the director of the institute, [redacted] He too had read Menzel's
book, but considered it an adequate treatment of the subject which he
consequently felt was closed. He indicated that no observations of UFO's
had been made by his staff and that they had received no reports of such
observations. However, when the [redacted] proceeded to indicate the
results of McDonald's critical study of the problem, [redacted] readily con-
ceded that there might be more to it and concluded by stating that it
was "clearly still an open question."
8. Another astro-
nومer mentioned that in the northern part of Kazakhstan
there had been repeated sightings of bell lighting. [redacted]
had sent a team out to investigate and discovered that what was
being seen were reflections of automobile headlights from an inversion
layer.
9. Later, a discussion was held with [redacted] He was not very impressed
with Menzel's book, but was also not impressed with the significance of
the phenomenon. It is possible that some interest was kindled that might
lead to additional investigations.
10. A stellar spectroscopist, [redacted] was also interested in this
problem. [redacted] was also dissatisfied with Menzel's book and felt that
there was definitely an opportunity for additional research.
11. The general feeling one gets is that no official treatment of the UFO
problem has been given in the USSR. Instead people refer to the US
work, principally Menzel's book, to demonstrate the absence of real
scientific problems. At the same time, there is an almost universal
awareness of the history and characteristics of the phenomenon often as-
sociated with considerable interest. The result is that a demonstration
of the inadequacy of US official explanations coupled with some proof of
the reality of the observations might excite enthusiasm more rapidly
among Soviet astro-
nومers than among their US counterparts who are more
strongly influenced by the official ridicule associated with UFO's in
the US.
